

Instruction on Cryomech compressor software versions

This document explains the differences between the different software versions, contained in the different folders. This file sharing was set up to allow customers to have quick access to the latest software for our CPA (PLC based touch screen) model compressors as well as access to historical files for the previous generation (Sycon panel / 2-line LCD display.)

Different software versions

CPA 2.XX Software Update (Latest Version): Use these files for 2.XX panels

CPA 3.XX Software Update (Latest Version): Use these files for 3.XX panels

CPA 4.XX Software Update (Latest Version): Use these files for 4.XX panels

There are (3) versions of CPA compressors and **the software is not interchangeable.**

- CPA 2.XX panels:
 - Manufactured 2016 through 2019
 - Only 2.XX versions of software can be installed
 - Version 1.XX can be upgraded to 2.xx
- CPA 3.XX panels:
 - Manufactured 2020-2025
 - Only 3.XX versions of software can be installed
 - 1.XX or 2.XX cannot be updated to 3.XX
- CPA 4.XX panels
 - Manufactured 2025-present
 - Only 4.XX versions of software can be installed
 - 1.XX, 2.XX or 3.XX cannot be updated to 4.XX

Finding your software version

To find your software version:

1. Click on the Setup Tab; then click the about tab

2. Software version will start with either a 1, 2, 3, or 4..

Non-CPA Files

Non CPA Files: Here you will find documentation and applications for the previous panel (2-line LCD display)
